

Welcome to Health2 Innovation

where a vibrant
collaboration
unfolds!

About the project

Higher Education Institutions, research hubs, tech wizards, and innovative minds aim to share insights, hatch brilliant ideas, and craft a unique training experience. This isn't just a partnership; it's a journey, an exploration, a rendezvous with the future of health and technology.

Target Group

Primary Target Groups

- Undergraduate/postgraduate students in the disciplines of Life Sciences, Medicine, Engineering or ICT-related studies
- Graduates in Life Sciences, Medicine, Engineering or ICT-related studies

Secondary Target Groups

- HEIs at a national and European level
- Training providers, including VET organisations, consultants, mentors and incubators
- Start-ups and SMEs

Objectives

- Enhance collaboration among education, research, business, and the public sector.
- Propel students and grads in Life Sciences, Medicine, Business, Engineering, or ICT studies into the digital health market.
- Establish a digital learning hub and app for training, guidance, mentoring, and networking.
- Engage students and graduates in the healthcare innovation ecosystem through mobility programs like the Health Innovation Bootcamp.
- Advocate for digital transformation and green transition in healthcare.

The consortium
